

Expt. 1 (03 Mar 09)

Notes:
mpk3 (BE) is our lab designation for a second *mpk3* mutant generated by fast-neutron mutagenesis (and provided by Brian Ellis); in other publications this is named *mpk3-DG* (deleted gene).

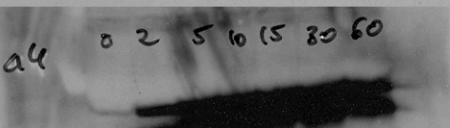

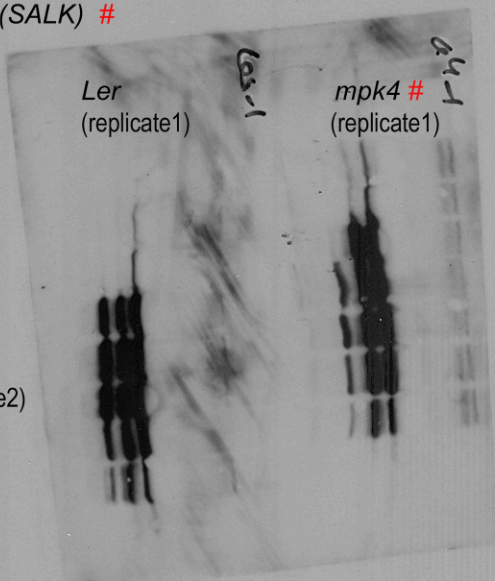

= blots eventually used for the final figure 1D

seed batch contaminated with *mpk3*-heterozygous plants?

see longer exposure of this blot below*

mpk6 gel partially cropped off during blotting (see data in expt2)

*Longer exposure of *mpk4*-replicate2 above (left side)

Expt. 2 (12 Mar 09)
